

Ellsworth and SpinURWheels.com Collaborate on MTB Skills Clinic at Lake Hodges

Ellsworth Handcrafted Bicycles and SpinURWheels.com are working together to support the local SoCal MTB scene by providing demo bikes and training for riders who are new to mountain biking or want to improve on their mountain biking skills.

SpinURWheels.com is an Escondido-based MTB company founded by former professional mountain biker Michele Lucero that is dedicated to teaching new mountain bikers all the basic skills they need to develop a sound foundation in trail riding. Classes cover basics such as shifting, braking, climbing, descending, etc., and also include bike maintenance and intermediate single track skills. Assisted by former pro Lacie Amisano, Michele makes her weekly classes enjoyable as well as challenging for any beginner or intermediate mountain biker.

For Michele's March 29th class, Ellsworth provided a variety of 8 bicycles to accommodate every riding style and skill level of her class participants. For information on the time and location of the next class, please visit www.spinurwheels.com or call 760 743 3857
